

## THE PERFECT LOCATION FOR YOUR **TECHNOLOGY** START-UP.

**STEAM** (science, technology, engineering, arts, math). Growing up with tech. A recently opened, first in Lithuania, Vilnius University STEAM centre at Šiauliai Academy offers the possibility for teenagers, in their 7th – 12th school years, to receive both theoretical and practical knowledge on the above subjects.

Tech and science oriented individuals can then progress by studying at one of the Vilnius University, Šiauliai Academy high quality Bachelor's and Master's degree programs. Some of which have the „Investors' spotlight“ quality sign.

In today's increasingly popular gig and short term contracts economy, we focus on long term talent development; professional skills, that are fully transferable between several sectors; continuous development and learning opportunities.
